Standard bypass installation

### D25F1 - 11 GPM

The D25F1 is the perfect addition to the Dosatron line of fertilizer injectors. This economy **11 GPM injector** is preset at a fixed rate of 1:100 (1%) and pairs nicely with the Eco-cart.

### D14MZ2 - 14 GPM

The D14MZ2 is the upgraded replacement for the 11 GPM model, allowing **flow rates up to 14 GPM**. It offers enhanced UV resistance and is perfect for one-hose operations or for use with our 15-gallon Dosacart or 5-gallon Li'l bud portable fertilizing system.

### D45RE15 - 20 GPM

The D45RE15 is for growers needing higher **flow up to 20 GPM**. It has a built-in bypass (on/off switch) and can handle up to two garden hoses on a single injector.

### D8RE2 - 40 GPM

The D8RE2 allows **flow rates up to 40 GPM** and can be installed in parallel for increased flow.

### D20S - 100 GPM

The D20S allows **flows up to 100 GPM** for large growing operations. For more flow, the D20S can be installed in parallel to allow flows up to 500 GPM.
