PROFESSIONAL PLANT FOOD 10-4-3

Nature's Source 10-4-3 brings out the best in everything you grow. Imagine better-toned plants... earlier flowering...darker foliage... with just one single liquid formula.

Sustainable. Contains oilseed extract, a renewable source of plant nutrition.

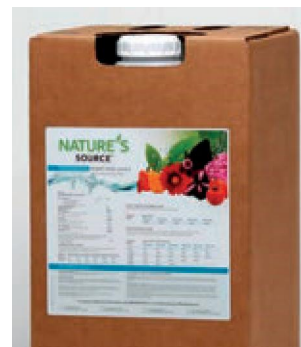

Easier on plants...and on you. Nature's Source is lower in salts than most commonly used water soluble fertilizers and can be used as a foliar mist without burning or stretch. It also reduces the amount of leaching necessary to reduce salt build-up. No residue on leaves, either – or blue stains on your hands!

Nutritional value. In addition to N-P-K, Nature's Source contains micronutrients along with calcium and magnesium, to improve your plants' performance.

Convenient. Nature's Source mixes easily with cold water. And it's the only plant food you'll need in your nursery.

Versatile. Nature's Source can be pulled straight from the container with compatible injection systems. Or dilute it according to your needs and inject a solution from your stock tank into your irrigation system through your injection equipment.

Cost effective. Highly concentrated Nature's Source offers a more economical, sustainable alternative to traditional synthetic fertilizer programs, at a lower input cost.

Home Gardeners can purchase the same formulation used by professional growers, and get the same great results. Nature's Source Plant Food 10-4-3 is available in four different Garden Jugs, and is now available in the 32 oz. (946mL) jug with a ready-to-spray hose-end sprayer.

Total Nitrogen	10%
3.70% Ammonical Nitrogen
