

Kentucky Bluegrass Engineered for Superior Turf Health

Lolium perenne ssp. stoloniferum

*What's in a name?
Everything.*

HEALTHY GRASS TECHNOLOGY

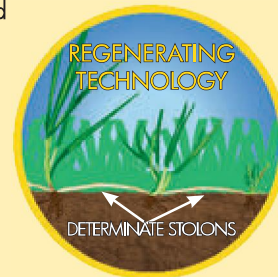

- Fast Germination and Aggressive Establishment
- Excellent Sod Formation and Sod Shear Strength
- Outstanding Traffic Tolerance and Recovery
- Early Spring Green-up
- Outstanding Summer Patch Resistance
- Highest Rated Kentucky Bluegrass for 16 Traits in 2005 NTEP Trial*

Available in TURF BLUE -
Premium Bluegrass Blends

SO UNIQUE IT'S GOT A NAME OF ITS OWN

Barenbrug's innovative research and development has produced a new star; a tough, traffic tolerant, regenerating perennial ryegrass that is recognized by scientists in a category of its own, *Lolium perenne* ssp. *stoloniferum*. RPR provides excellent turf quality and outperforms traditional perennial ryegrass in both traffic tolerance and turf regeneration. When perennial ryegrass is the turf of choice, RPR is the ideal selection.

RPR[®] Innovation

- Superior traffic tolerance and persistence
- Produces determinate-stolons for regeneration
- Endophyte-enhanced for improved stress tolerance
- Very heat and drought tolerant
- Ideal for golf, sports, recreational, residential and commercial turf
