

Horticulture Injectors **Reduced Cost, Enhanced Quality**

Dosmatic's fertilizer injectors assure beautiful blooms, healthy crops, plants, woody ornamentals, turf and trees by consistent and accurate dosing—each and every time. Dosmatic's patented mixing chamber and proportional injection technology means less waste, plus a better mix for fertilizers, pesticides and other water-soluble products.

Outstanding in the field, nursery or greenhouse

From boom irrigation fertigation to floral misting—and every application in between, Dosmatic's versatile non-electric injectors offer the widest range of flow and injection rates and sizes to accommodate your needs. It's no wonder more professional horticulturist turn to Dosmatic.

The **Dosmatic MiniDos** low-mid flow, fluid (water)-driven proportional injectors offer a low cost alternative to traditional, non-electric technology. These injectors are compact and offer the widest range of injection ratios.

MiniDos

0.4%, 1%, 2.5%, 5%, 10%, 20% Injector Series
The most versatile injector in the industry

Flow Rates 0.03 - 12 gpm

Injection Ratios 1:4000-1:5 or 0.025%- 20%

The **SuperDos** 0.3% models have been re-engineered with a rotating lower end. The improvements now allow the customer to adjust their ratio setting (can still be done while in operation) without having to deal with a twisted, tangled suction hose. Dosmatic has also added wrench flats to the suction tube fitting assembly to make maintenance easier and to avoid thread damage.

SuperDos[®]

15TF, 20, 30, 45, 90 Injector Series
Lowest dilution, highest flow chemical injector in the industry

Flow Rates 0.04 - 90 gpm

Injection Ratios 1:200-1:20 or 0.5%-5.0%

Easy to install, use and maintain

For over 25 years, Dosmatic has offered the best fertilizers and injectors for the horticulture, farming and florist professional. Our injectors come with a standard off/on switch, allowing the user to stop the injection—not the system. Interchangeable lower ends will let one injector be used for multiple applications—no need to purchase more injectors. Our TurboDos injectors allow dual injection at high-flow rates, reducing treat times and eliminating the need for multiple injectors.

Dosmatic has the industry's best three year limited warranty.
