Proven Effective-Developed for professionals

- **Labor Saving**-One application per season saves time and repeat visits

REGALSTAR G

RegalStar G is a combination of **oxidiazon** & **prodiamine** which controls virtually all germinating grass and broadleaf weeds.

Rate: Apply 4 lbs of RegalStar G per 1,000 sq ft of bed area, can be applied as soon as beds are clean.

Size: 50 lb bags

REGALKADE G

RegalKade G is the only granular form of **prodiamine**. It is one of the most economical weed control available. Safe on turf if over-application occurs!

Rate: Apply 3.5lbs of RegalKade G per 1,000 sq ft of bed area, can be applied as soon as beds are clean.

Size: 50 lb bag

REGAL 0-0

Regal 0-0 is a combination of oxadiazon and oxyfluorfen. Tough on grasses and broadleaf weeds while remaining gentle on ornamentals

Rate: Apply 2.3 lbs per 1,000 sq. feet or 100 pounds per acre

Size: 50 lb. bag

As a general rule— an approximate half inch of rain water should be applied after application to water in the herbicide as well as wash granules off the plants foliage. Once applied, do not disturb the soil surface as uniform placement will be disrupted and effectiveness reduced.
