

Nufarm Diquat SPC 2L

Fast-acting Control of Tough Aquatic Weeds.

Nufarm Diquat SPC 2L has long been a workhorse herbicide for the specialty market. Diquat SPC 2L herbicide provides non-selective control of aquatic weeds on contact. It spreads quickly through the water for broad-spectrum control of floating, submersed and marginal weeds. The product is foliar-applied and is slightly translocated through plant tissue. A surfactant enhances activity. It is completely inactivated on contact with soil. With Diquat SPC 2L herbicide, there are no concerns about groundwater, toxicity to fish, other organisms or wildlife.

KEY PERFORMANCE BENEFITS

- Works quickly – no waiting for aquatic weed control
- Broad-spectrum activity successfully controls key aquatic weeds
- Non-systemic, contact activity controls only the weeds it contacts
- Easy-to-use liquid formulation makes application trouble-free

EPA REG. NO.	228-675
ACTIVE INGR.	diquat dibromide (37.3%)
FORMULATION	liquid
CHEM. FAMILY	bipyridilium
GROUP NO.	22
MODE OF ACT.	acts on contact absorbs energy produced by photosynthesis; forms peroxides that disrupt living cells
SIGNAL WORD	caution
RESTRICTED	no
PACKAGE SIZE	4 x 1 gal, 2 x 2.5 gal, 250 gal tote

Nufarm

Diquat SPC 2L

KEY USES

Aquatic areas*
 Commercial greenhouses and nurseries
 Dormant established turfgrass (*bermudagrass*,
zoysiagrass – *nonfood or feed crop*)
 Landscape, industrial, recreational,
 commercial, residential, and public areas
 Ornamental seed crops (*flowers, bulbs, etc.* –
excluding the state of California)
 Turf renovation (*all turf areas except*
commercial sod farms)

KEY WEEDS CONTROLLED

(See product label for complete list)

FOATING AND MARGINAL WEEDS

Water lettuce
 Water hyacinth
 Duckweed
 Salvinia spp.
 Pennywort
 Frog's bit
 Cattails

SUBMERGED WEEDS

Bladderwort
 Hydrilla
 Watermilfoils
 Pondweeds**
 Coontail spp.
 Brazilian elodea
 Naiad
 Algae†

* *Diquat E-Pro 2L cannot be applied for aquatic uses in New York state without Supplemental Special Local Needs labeling*

** *Diquat E-Pro 2L herbicide does not control Richardson's pondweed, *P. richardsonii**

† *Suppression only*

USE SUMMARY

Diquat SPC 2L herbicide is used to control aquatic weeds in public waters such as ponds, lakes, reservoirs, marshes, bayous, drainage ditches, canals, streams, rivers, and other slow moving or quiescent bodies of water. Do not apply to water that is moving or if outflow leads to public waters.

Do not apply this product through any type of irrigation system.

Take caution to avoid drift onto desirable crops and vegetation.

OPTIMUM CONTROL OF SUBMERSED WEEDS

Optimum control of submersed weeds is obtained by applying Diquat SPC 2L herbicide when the weeds are actively growing (photosynthesizing), typically when water temperatures are about 50°F or more. Do not apply to weeds growing under stress.

See label for complete directions for use.
