Directions for Use

Application tips: Flat fan spraying tips are recommended when applying **Turf Mark® Green**. Increased volumes of spray solution should be used when **Turf Mark Green** is applied to hard-to-mark areas. Longer or thinner stands of turf or sod may be more difficult to mark due to the non-uniform marking surface. Increasing the total volume of spray solution applied to those areas should reduce marking difficulty.

Experimentation with the volume of spray solution and rate of **Turf Mark Green** applied per acre or area should allow each applicator to establish a rate that is functional and economical for each application. The more **Turf Mark Green** used, the darker the spray pattern.
